

CROPP COOPERATIVE

SPECIALTY DAIRY PROTEINS

Organic Valley's high-quality, organic whey and casein proteins are known for their outstanding nutritional values and a wide array of functional benefits. These dairy proteins provide a variety of functional capabilities to food and beverage formulators, from texture and flavor improvement to increased yield.

Our specialty dairy proteins are an economical source of dairy solids that help customers meet the ever-growing demand for healthy ingredients, whether in infant nutrition, beverages, snacks and bars, bakery, or other applications.

- **LACTOSE**

Our WPC80 and WPI90 can also be agglomerated

Here's what makes our whey proteins organic:

- Organic Valley farms are certified organic by the USDA.
- Organic Valley farmers do not use antibiotics, synthetic hormones, toxic pesticides or GMOs.
- Organic animal feed cannot contain GMOs.
- USDA-certified organic products are eligible for export to Canada or the EU under an arranged Equivalency Arrangement. EU organic standards allow antibiotics for livestock, so any products derived from treated animals cannot be exported to the U.S. as organic.
- Organic Valley also certifies to China's National Organic Standards. Selected products are eligible for export to China as organic.

Ask us about other organic dairy export possibilities to serve your needs around the world.
